   4. Use student-centered activities in pairs/in groups that will help students focus on grammatical
      structures (use dialogs, fill-in the blanks, interviews...);

   8. Use reading materials to build schema for writing assignments;
   9. Use student model paragraphs to generate discussions on what makes a paragraph strong or weak.

Enrollment Limitation Validation Form
Type of Validation: Content Review

COLLEGE OF SAN MATEO

Dept. & No. (e.g. SPCH 120) **ESL 825**

Course Title: **Writing for Non-Native Speakers I**

Enrollment Limitation(s): **Recommended Preparation: Appropriate skill level as indicated by placement tests and other measures.** Students are strongly advised to enroll concurrently in ESL 845 or higher course, ESL 855 or higher course and READ 807

(If more than one type of enrollment limitation, attach required validation forms for each type.)

1. What is the educational rationale for the recommended or prerequisite course, skill, or information?

ESL 825 (Level 1 Writing) is designed for high-beginning ESL students as the first in a core of sequential writing courses in our program. Students must start the program with some basic English grammar and writing skills; therefore, the students’ placement test scores and other measurements will indicate their beginning-level language skills.

2. Why is knowledge of the recommended or prerequisite course, skill, or information necessary for students to succeed in the "target" course? Specify the relationship between the prerequisite knowledge and skills required of students and those taught in the "target" course. (Please list the specific proficiencies students must possess in order to succeed in the "target" course.)

In order for students to use high-beginning grammar and writing skills, they need to already have some basic writing skills; a student with no English grammar and writing ability will have difficulty succeeding in the tasks assigned to them in ESL 825.

Global errors: Errors that interfere with the reader’s understanding of the text, that impede meaning. These errors are more significant than surface errors, and grading should reflect this.

Surface errors: Errors that do not interfere with the reader’s understanding of the text, that do not impede meaning.
