

## Pacific Asian Cinema – Youth Cultures & Beyond

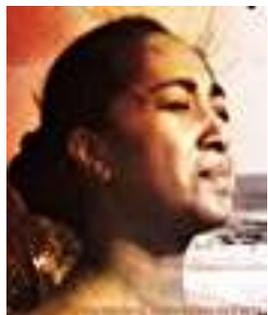

This course will survey international films from East Asia, Southeast Asia, and Oceania during the “Y2K/Millennial” period (~1995-2005) specifically looking at youth culture and “coming of age” experiences. You will learn how to study film as an international art form through screenings and discussions of narrative, documentary, and short experimental films. We will engage in a cross-cultural dialogue with filmmakers, scholars, and guest speakers. Join this cinematic celebration of diversity, global studies, and transnational collaboration.
