Assignment: What You Need to Do

Butte and Foothill: one game was a loss, the other a victory. But why? What made the difference? Based on your own experience and observation, your notes from class, and your discussions with teammates and coaches, what was the single, most important factor in the difference between the Bulldogs' performances at Butte and Foothill? Compare our team's performance in these two recent games, focusing not on what the other team did or didn't do, but rather on what the Bulldogs did and how they responded to their opponents' actions. In other words, compare these games in terms of what the Bulldogs had control over, not in terms of what they had no control over.
