Today's Purpose

- Communicate openly
- Prepare for Inventory Project
 - Not easy for students to navigate; students often unintentionally take excessive units
 - Need to inventory the courses we have and start imagining a better way to present potential course-taking options (pathways) to students to enable them to complete their educational goals in a more timely manner (70% of community college students [fail to complete at all](#))
- Engage the CSM community and capture your voices in this work
 - What courses does your major require?
 - What GE courses may complement your required courses?
 - What advice can you give other majors in taking classes from your course offerings?

Why are we doing the Inventory Project?
