CSM’s Honors Project invites students to join an innovative community, where faculty from across disciplines engage students in a dynamic academic experience.

Once accepted, students will earn honors credit in selected transfer courses by developing and successfully completing advanced research projects.

Who Should Apply?
Transfer-bound students who want to gain high-level academic skills that will improve their chances for success.

How Does the CSM Honors Project Work?
Students will earn honors credit (transcript notation) in selected transfer courses by concurrently enrolling in an Honors Project research seminar. Seminars are interdisciplinary and collaborative, providing intensive instruction in research methodologies. Faculty guide students in creating a distinctive, advanced final project. A variety of informational meetings, activities, receptions, and presentations will be part of the Honors Project.

All instructional divisions may participate: Business and Technology; Creative Arts and Social Science; Kinesiology, Athletics and Dance; Language Arts; or Math and Science.

Note: Students must be accepted into the Honors Project before registering for seminars.

Fall semester begins August 20. Apply to the CSM Honors Project now!
