

Instructional Program Review Introduction

Core Program and Student Success Indicators: Spring 2014 Cycle

The Office of Planning, Research, and Institutional Effectiveness (PRIE) provides program review data for more than academic programs and departments including both those on the annual and comprehensive cycles. These also include summary data for the divisions.

All data is available at the Program Review section of the PRIE website along with, previous years' data and completed Program Reviews, forms, and other resources.

See: http://collegeofsanmateo.edu/prie/program_review/program_review.php.

Overview

For the Spring 2014 Program Review cycle, PRIE provides 3 years of the academic-year data and one year of students' demographic data. (Academic year = Fall + Spring semesters combined.) Data for several programs are disaggregated and multiple data sets are published for some departments. (For example, Art consists of Photography, Art 2-d, Art 3-d, and Art history.)

Data Sets

Data are available online for CSM as a whole, each division as a whole, and each department or program as indicated on the Program Review list.

They include:

Comprehensive 3-Year Look for Academic Years: 2010-11, 2011-12, 2012-13

- includes core program indicators
- excludes summers
- includes student success and achievement data (i.e., success rates and withdraw rates) for each of the 3 academic year time periods, disaggregated by ethnicity, gender, and age

Core Program Indicator Data Solely (where applicable)

- 3 years of Fall terms only, 2010, 2011, and 2012
- 3 years of Spring terms only, 2011, 2012, and 2013
- 3 years of Summer terms only, 2011, 2012, and 2013
