

STUDENT HOUSING SERVICE

3e:

The Student Housing Service has one SLOs and one SAO.

SLO: Students attending the mandatory Housing Workshop will know how to search, request, and apply for student housing.

- In AY 2017-2018, 410 students completed the Housing Workshop. The SLO was assessed by a post-workshop quiz, which indicated a success rate of 95%.

Staff would like to find out whether students retain this information as they go about the business of finding housing, and whether it was sufficient.

They plan to survey students who have completed the workshop in the past and gone on to find housing, to see if there are any improvements needed to the workshop (see Planning).

SAO: Eligible students will be able to complete and submit their Housing Application online.

- The application process was successfully digitized in July 2017. All students now complete their application process online. Staff will develop a new SAO for the coming year (See Planning).
