

## 2018-19 Instructional Program Review

Program Name: Enology/Viticulture

Program Contact: Herbie Hancock

Academic Year: 2018-19

Based on work in equity, our assessment planning for the coming year includes:

- **Participate in flex ILO activity on ethical responsibility and effective citizenship (#6).** In line with curricular revision (see below), establish common ground with other disciplines around this outcome to ensure strong alignment.
- **Revise curriculum based on program assessments.** Revise AG 202 to include ethical and citizenship responsibilities in winemaking and grape growing (Fall 2018/Spring 2019).
- **Assess E3TTS pedagogical and curriculum improvements.** Faculty planning to participate in the E3TTS training will evaluate the effect of these improvements on student learning to see what works best with our students (through surveys, analysis of student work).
