June 10, 2019

Parking permit requirement
begins for Summer 2019
June 17, 2019

Independence Day Holiday
July 4, 2019

Sexual Misconduct & Title IX

METaS

Overview

What is METaS?

"Metas" means "goals" in Spanish, and the goal of the METaS project is to improve the success, retention, and completion of Latino/a and low-income STEM students at the College of San Mateo. By fostering a supportive community of faculty, administrators, and peer tutors, METaS wants to help **you** achieve your academic goals while celebrating the impact of Hispanics and Latinos in Bay Area STEM fields. The METaS project is funded by an HSI-STEM grant through the Department of Education.

What is STEM?

STEM stands for Science, Technology, Engineering, and Mathematics. Did you notice that METaS backwards looks a lot like STEM – Science and Technology, Engineering, and Mathematics! At CSM, you can earn an Associates degree in programs like Chemistry, Biotechnology, Web & Mobile Application Development, and Engineering Technology! CSM will also allow you to fulfill requirements to transfer to a four-year institution, with prerequisite courses available in numerous STEM fields. Did you know that in 2013, only 9% of the students nationwide who earned STEM degrees and certificates were Hispanic? Here at CSM we have some of the best students and some amazing STEM programs – together, we can change that number!

What is HSI?

HSI stands for Hispanic Serving Institution, which is a higher education institution with an undergraduate full-time enrollment of at least 25% Hispanic students. In 2015, the College of San Mateo had an enrollment of 30%, and we expect this to reach 42% by 2021!

What programs does METaS offer?

METaS has a variety of support systems and programs to help you succeed in your academic goals here at CSM. Some examples include Peer Tutors, Supplemental Instructional Leaders, Math Jams, Science-In-Action Speaker Series, professional development opportunities and transfer support.

Join Us!

METaS is open to all Latino/a or low-income students who are interested in STEM. If you are interested in receiving monthly email updates about STEM opportunities, events and resources fill out our [quick registration form](#). We look forward to helping you reach your goals!
