

ENGL 100 Reading and Composition

Modes of Delivery

- Lecture
- Online
- Hybrid

Distance Ed Supplement

- Revision to existing distance education supplement

Distance Education Training

Distance education component was developed by an instructor with training in online pedagogy.

Training: Faculty took the district STOT training, which teaches them to teach online with an emphasis on student accessibility.

Method of Distance Education

- Online, Hybrid, Web Assisted Course; (If there are limitations on how this course would be offered please explain below)

Course Content and Methodology:

- The objectives and content of the course are adequately covered by the methods of instruction, assignments, evaluation of student outcomes, and instructional materials.
- If this course is currently taught in a lecture mode, the department faculty have determined that the same objectives can be achieved in a distance learning mode.
- The instructional equipment and materials are sufficient.
- The preparation and training of faculty are sufficient.
- Regular personal contact between students and instructor is sufficient.
- Methods of student evaluation are designed to maintain examination security.
- Evaluation of student outcomes is sufficient to permit review and assessment of the effectiveness of distance education for this course and to provide information for the annual distance education report.

Instructional Methodologies (How will you deliver the course content?):

- Announcements/Bulletin Boards
- Chat Rooms
- E-mail
- Electronic Forum
- Resource Links

Representative Courseware/Textbooks Materials:

No additional texts apply.

Methods of Evaluation of Student Performance:

Online quizzes and Discussion forums

How are you ensuring that students with disabilities can access your course in accordance with Section 508?

All images will have text descriptions, all videos will have captioning, and all audio will have transcriptions. The DRC contact information will be included in the syllabus and all documents will be structured according to ADA regulations.
