**Summer 2019 Session begins**  
June 10, 2019

**Parking permit requirement begins for Summer 2019**  
June 17, 2019

**Independence Day Holiday**  
July 4, 2019

**Sexual Misconduct & Title IX**

## MESA

### Overview

Mathematics, Engineering, Science Achievement (MESA) serves underrepresented, economically and educationally disadvantaged or first-generation students. MESA is changing the face of science, technology, engineering and math (STEM) by creating and developing a new generation of STEM leaders. Our programs fuel diversity by propelling historically underrepresented groups toward STEM degrees and professional careers.

### Objectives

- Increase number of underrepresented, economically and educationally disadvantaged or first-generation students who pursue degrees in STEM fields, and who successfully transfer to four-year colleges and universities.

### Services

- Counseling and transfer services
- Space for MESA Center in the [Integrated Science Center \(ISC\)](#)
- Academic Excellence Workshops
- Internships and scholarships
- MESA-related student services

### Student Support Services

- **Math & Science Jams**  
One-week intensives the week prior to the start of each semester to sharpen student skills in math.
- **Math Resource Center (MRC)**  
Any student taking a math class is welcome at the MRC. Assistance in all levels of math is available from trained student tutors as well as faculty and an instructional aide who manages the MRC.
- **Learning Center**  
Tutoring by appointment or drop-in counseling is available at the Learning Center. In addition, there are rooms for group study. The Mathematics and Science Division provides additional funding for math and science tutors at the Learning Center after the MRC is closed.
- **Supplemental Instruction (SI)**  
Provided for basic skills, math courses, and introductory chemistry. Study groups for SI are coordinated for the faculty for specific courses.
- **Academic Excellence Workshops**  
Offered during the fall and spring semesters in calculus, engineering, physics, and introductory chemistry.
