**Importance:** High

---

Hi Team,

Our ITS team has updated all of our CSM Library public desktop stations over the break.

The most important update is there's ***NO login to use the desktops***. Any student and community member may hop on a desktop and use the computer. No more logging in with a library card or guest passes or extending time at a station. ***Computers will automatically turn on at 6:00am and automatically shut down at 11:00pm. All files will be wiped off each evening.***

Here's the list of updates and more info for the packages below:

- No Logins to use desktops
- Windows 10
- MS Office Suite 2016
- Adobe Suite 2018
- QuickBooks
- Pearson
- Fusion 2018: Jaws and Zoom Text, FS Reader
- Kurzweil 3000
- Makerbot
- Ultimaker Cura
- Arduino

### **ADA accessibility software**

ALL stations include ADA software to read webpages, digital or scanned documents, with text to speech capabilities, etc.

- **Kurzweil 3000** is a site license with limited users at the same time. *The Disability Resource Center (DRC) issues individual logins for students.*

The Library has a generic login:

User name: csmkurzweil4

Password: csmcsm4

- **Fusion 2018: JAWS + Zoom Text** - no login

### **QuickBooks**

No login necessary. The Library is providing access to QuickBooks for students especially since the Business Lab closes at 4:30pm and is closed Saturdays.

### **Pearson**

Students get the login from the course they're enrolled in. If they take a test it locks down the

computer for exams.

I am also attaching an image of the desktop. Please let me know if you have any additional questions.

Thanks,

Ellie
