

CSM Anatomy Digestive System Guide

HISTOLOGY

~~ID major features of esophagus,
stomach, small intestine, large
intestine, appendix~~

ID major features of pancreas and
liver tissue

Digestive System

mouth

- oral cavity
- oral vestibule
- hard palate
- soft palate, uvula
- lips
- cheeks
- tongue
- lingual frenulum
- lingual tonsils
- teeth
 - alveoli
 - gingivae
 - periodontal ligament
 - crown
 - roots
 - neck
 - dentin
 - enamel
 - cementum
 - pulp cavity
 - root canal
 - apical foramen
 - dental caries
- parotid salivary gland
- sublingual salivary gland
- submandibular salivary gland

fauces

oropharynx

laryngopharynx

palatine and lingual tonsils

esophagus

esophageal hiatus

lower esophageal(cardiac)sphincter

stomach

- lesser & greater curvatures

- body

- pyloris

- rugae

pyloric sphincter

small intestine

- duodenum

- jejunum

- ileum

ileocecal valve

vermiform appendix

large intestine

- cecum

- ascending colon

- transverse colon

- descending colon

- sigmoid colon

- haustra

- taenia coli

rectum

anus

internal anal sphincter

external anal sphincter

common bile duct

hepatic duct

cystic duct

pancreatic duct

pancreas

liver

gallbladder

lesser omentum

greater omentum

mesenteries
