

Associated Students of College of San Mateo

Statement in Support of Black Lives Matter, Anti-Racism, and Social Justice

The murders of George Floyd, Breonna Taylor, Ahmaud Aubrey, and countless other Black Americans have served to bring renewed attention to the systemic racism still present in the United States. As part of an open access educational institution that is committed to social justice, it is our responsibility to identify all forms of oppression, call them out, and dismantle them. The Associated Students of College of San Mateo will work to support the Black Lives Matters movement, as well as initiatives that promote anti-racism and serve our hyper-marginalized student populations. In all that we do, we will endeavor to educate our peers and campus community about the challenges faced by the students we serve and to dismantle the systems of oppression, white supremacy, and anti-Blackness that are present at CSM and in our society.
