Subject: updates to Academic & Career Community

Based on new information received from program faculty and input from division deans, the Guided Pathways Steering Committee has revised the Academic & Career Communities to better reflect program alignment and provide clarity for students by making the following changes:

- **Dissolved ACC: Applied Technology.** Programs have been relocated as follows:
 - Electronics Technology, Architecture, Building Inspection and CAD will go to Science & Engineering
- **Rename:** former ACC Business, Management & Public Service is now called Business & Public Service

The changes will be made on all front facing and back-end material. Thank you to program faculty for their feedback and continued collaboration as we clarify our Academic & Career Community model.
