## Celebrating Latiné Heritage Month at College of San Mateo

CSM celebrated Latiné Heritage Month through "The Expansiveness of Latinidad," a series of gatherings honoring the diversity of Latiné identities and experiences. Art, story-telling, music, food, and conversations about belonging brought students, employees, and community members together in connection and joy.

## College of San Mateo Coastside Welcomes Neighbors with JobTrain

College of San Mateo Coastside hosted an Open House in partnership with JobTrain, welcoming Half Moon Bay neighbors to explore opportunities for learning and career growth close to home. Visitors connected with staff, learned about classes and student services at CSM Coastside, and discovered how JobTrain supports local residents with career exploration and job search.

Since opening its downtown Half Moon Bay location, CSM has focused on listening to Coastside residents: what they hope to learn, which skills they want to build, and what support would make education easier to access. Those conversations continue to inform the College's offerings, from English language learning and career education to counseling, financial aid, and enrollment assistance. The Open House kept that conversation going alongside a community partner committed to helping residents move toward their goals.
